IOT FOR HOTELS/RESORTS/ CASINO

COMMERCIAL REFRIGERATION MONITORING

- Prevents food spoilage and costly damage to equipment
- Monitor refrigerators & coolers in Hotel bars, In-house restaurants, Ice machines and banquet facilities
- Enforced food safety regulations from Food Safety Modernization Act (FSMA) often require around-the-clock monitoring at 15-minute intervals
- Immediate alert sent with temperature or humidity fluctuations
- Cost of a defrosted refrigerator one time = one year of monitoring cost
- Eliminates manual/paper monitoring

ENVIRONMENTAL MONITORING

- Streamline collection of environmental data
- Monitor water detection, lighting, door activations, power on/off, pest control
- Alerts for unexpected water intrusion, ambient temperature fluctuation, blown fuses, high humidity levels and power loss
- Reduce/eliminate manual labor

BUSINESS CONTINUITY

- Cost of a one hour outage pays for three months of failover
- Prevent angry customers
- Prevent lost business
- Prepare for disasters (storms, cables cuts, network Issues)
- Open new locations same day

Let SensLynx provide a no-cost analysis of your environment and show you how you can save time and money while avoiding potential catastrophic failures.
